

Women in Construction

Many Paths 
ONE MISSION

“Go with your gut, your instincts are usually spot on. This quote conveyed to me by a beloved mentor has helped me not only within the industry (auditing and handling financial projections for construction projects) but has served me well in my personal life.”

Trish Jeffrey
Harvey Construction
Project Accountant

Lee-Ann Dicey

Milton Cat

Regional Machine Inventory Coordinator

"Do not give up when you are met with adversity. Not all companies are created equally, find the one where you fit, are accepted, and supported. You will be faced with tough situations and sometimes feel like you need to prove that you belong here, maybe more often than you'd like, but don't give up, it's all worth it in the long run. Know your worth and don't be afraid to speak up and take up space!"

Sara Ihle

The H.L. Turner Group Inc.

Assistant Project Manager

"If you do not have a formal mentorship program at your firm, seek resources to help you. I was fortunate to have coworkers take me under their wing and involve me in the process from project inception to completion. The knowledge, guidance, and encouragement a mentor will provide you will open doors and enhance your growth!"

Harvey Construction
Assistant Project Manager

“Go for it! Don't be intimidated by the big “dogs”. You have the knowledge and skills to bring to this world, so bring it! You miss 100% of the shots you don't take. Also, you are human, you will mess up sometimes, just take what you learned from it, and apply it towards bettering yourself for next time.”

"Ask questions, listen, and absorb all the experience around you. Coming into this industry there are people who have been doing this work for their entire career, and there is so much that we can learn from them. Our greatest resources in this industry are the people."

Michelle Trodella

Methuen Construction

Director of Operations Administration

“Do not hesitate to ask questions and seek guidance in areas you are not familiar with.

Letting your voice be heard by offering a solution, making a statement, or asking a question ALL have the same value and impact as a contributing member.”
